South Korea

I am an undergraduate student in the Department of AI Engineering at **Chosun University**, South Korea. My research interests include **Artificial Intelligence**, **Computer Vision**, **Large Language Models**, and **Vision-Language-Action Models**.

EDUCATION

Chosun University 2022 – Present

B.Eng. in Artificial Intelligence Engineering · 3rd Year

- GPA: **4.0+** / 4.5 · Ranked 1st in department (2nd year, both semesters)
- Relevant Coursework: Natural Language Processing, Deep Learning

PUBLICATIONS

2026

Pedagogical Alignment for Vision-Language-Action Models: A Comprehensive Framework for Data, Architecture, and Evaluation in Education

U Lee, J Jeong, S Shin, H Park, J Moon, Y Song, J Shim, JH Lee, Y Noh, S Choi, A Kim, **TH Kim**, K Joo, T Kim, G Lee
arXiv preprint arXiv:2601.13876

AWARDS

Best Prize Chosun University | Jan. 2026

- 8th AI ROBOTICS Convergence Idea Competition

Bronze Prize Hansung University | Feb. 2026

- Dual-arm Robot Physical AI Hackathon Competition

PROJECTS

PEFT-based Fine-tuning Research 2026 – Present

Research on Parameter-Efficient Fine-Tuning (PEFT) methods for large-scale language and vision models.

- Status: *In Progress* — details to be updated

EXPERIENCE

Global Buddy Program — Mentor Chosun University | Apr. – May 2026

- Mentored international students in weekly meetups, helping them adjust to studies and life in Korea

Chosun Algorithm Club (CAC) Chosun University

- Member of CHOSUN ALGORITHM CLUB — competitive programming and algorithm study

CAREER GOAL

- Computer Vision Engineer
- Large Language Model Researcher
- Physical AI / Robotics Developer

SKILLS

Python · Advanced
PyTorch · Intermediate
Git · Intermediate
AI Agent · Intermediate
Linux · Basic (1 year)
